

CS608 - WEB DEVELOPMENT LAB
M TECH
SEMESTER II
LAB 7

Date: 18/03/2025

1. Develop two independent web applications, first a simple e-commerce website and the other is a banking application. Use web services to communicate between the two applications. The following requirements are to be mandatorily implemented:
 - a. The e-commerce website should provide at least 3 different categories of products and at least 10 items in each category
 - b. Provide a description for each product or item
 - c. A user can select any number of items based on his/her preference
 - d. After confirmation of the selected item the user can enter his/her delivery and billing address and proceed for payment
 - e. Upon clicking the payment option the user should be redirected to the banking web application's payment gateway
 - f. A confirmation notification should be provided to the user with the information about the product ordered, quantity, delivery address, expected delivery date, and a note confirming the order.
