

**CS608 - WEB DEVELOPMENT LAB**  
**M TECH**  
**SEMESTER II**  
**LAB 6**

Date: 11/03/2025

1. In the previous exercises you had developed web pages for applications such as managing insurance claims, lodging maintenance related complaints, and hosting a library site. For this lab program, consider any one of the previous applications and perform dynamic database access and updation, and display using the AJAX programming language while using a web server at the backend. Following are some of the operations that are to be mandatorily included,
  - a. Display all entries of the database on a new web page
  - b. Access specific entries or rows in the database and display them
  - c. Access specific columns of the database table and display them
  - d. Update a row in the database and display the updated database
  - e. Display only the IDs of all the entries and when a user clicks over the ID then only the details corresponding to that ID should be displayed

Note: Use AJAX programming language.
